EXPERIENCE

Morgan Stanley

New York, NY

Director / Tech Lead – Institutional Securities Tech – Full Stack Developer

Mar 2024 – Present

- Own core services supporting a distributed data platform composed of No SQL databases, Kafka messaging, real time ingestion pipelines and Spring based APIs.
- Overhauled bond reference data cleaning workflows used by real time trading systems, improving data accuracy and operational reliability.
- Improved high priority Bloomberg data ingestion pipelines, reducing processing latency by more than 5x.
- Modernized legacy Spring services through large scale upgrades across major Spring, Gradle, and JDK versions, improving maintainability and stability.
- Drove adoption of automated SDLC workflows and developer tooling initiatives across the department.
- Managed and enhanced a high impact loan pricing platform (backend and frontend) supporting trading operations and internal users.
- Automated pricing export and data processing for trading desks, reducing turnaround time from 1 week to under 4 hours.
- Built backend services for ETF trade booking dashboard utilizing Python Tornado, PostgreSQL database design, and CPS real time messaging.
- Introduced AI assisted workflows using GitHub Copilot CLI to improve engineering productivity across backend and frontend development.

Morgan Stanley

New York, NY

Associate – Institutional Securities Tech – Full Stack Developer

Aug 2021 – Mar 2024

- Owned and operated a large-scale Mongo DB + Elasticsearch cache housing reference data for 30+ million bonds.
- Led containerization and streamlined workflows for 70+ distributed Spring services and ingestion processes using Docker.
- Automated Ready for Business checks to ensure the highest data quality for real time trading users.
- Designed and implemented batch and streaming data loaders using Java Spring from REST APIs, CPS messaging systems, files, No SQL databases, and Sybase/KDB sources.
- Created internal data merging and stored procedure frameworks that simplified onboarding and customization for downstream consumers.
- Spearheaded development of Angular based tooling for querying and visualizing bond reference data via AG Grid.

Morgan Stanley

New York, NY

Technology Analyst Internship – Institutional Securities Tech – Backend Developer

Jun 2020 – Aug 2020

- Built Java Spring services to capture and monitor application usage metrics.
- Leveraged Apache Kafka and Elasticsearch pipelines for real time analytics and operational monitoring.

EDUCATION

Morgan Stanley Technology Analyst Program

New York, NY

Graduated from Morgan Stanley's rigorous 10 week Backend Developer Training Bootcamp

Aug 2021 – Nov 2021

Stevens Institute of Technology

Hoboken, NJ

Master of Engineering - Applied Artificial Intelligence

Aug 2020 – May 2021

Stevens Institute of Technology

Hoboken, NJ

Bachelor of Engineering with High Honor in Computer Engineering, Minor in Computer Science

Aug 2016 – May 2020

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, Scala

Frameworks & Systems: Spring, Project Reactor (Flux), Elasticsearch, Mongo DB, Tornado, Angular, Distributed Systems, Real-Time Data Pipelines, Batch & Stream Processing

Infrastructure & Tools: Kafka, CPS/MQ, Docker, Node.js, Git, Google Protobuf, Sybase/Postgres/KDB, OpenTelemetry, CI/CD
