EXPERIENCE

Morgan Stanley

New York, NY

Director / Tech Lead – Institutional Securities Tech – Full Stack Developer

Mar 2024 – Present

- Lead core development, user onboarding and maintenance of existing Distributed System consisting of noSQL databases, real time data loading processes, real time messaging queues (Kafka) and robust Spring Web servers.
- Overhauled data cleaning process for Bond Reference data depended on by real time bond trading systems.
- Modernized multiple legacy Spring Web Service upgrading major Spring, Gradle, and JDK Versions.
- Led department wide initiative to automate the SDLC process and track adoption statistics.
- Inherited ownership of high leverage Spring Web loan pricing tool with angular UI used by trading desk.
- Implemented overhaul for automating heavily manual pricing export and ding models to cut development time for Trading Desk requests from 1 week to 4 hours.
- Optimized real time data ingestion processes for high priority Bloomberg data to load seamlessly and within seconds (over 5x faster than original process).
- Built backend for ETF portfolio trade booking dashboard utilizing Python Tornado Web Server, Postgres DB design, and CPS messaging.
- Led agentic workflow adoption with firm's newly acquired Github Copilot CLI among team's server and UI projects to streamline development and SDLC workflows.

Morgan Stanley

New York, NY

Associate – Institutional Securities Tech – Full Stack Developer

Aug 2021 – Mar 2024

- Owned and operated a high-scale Mongo DB + Elastic Search cache housing reference data for 30+ Million bonds.
- Led containerization efforts for Distributed System with 70+ Spring data loading processes and web services.
- Automated Ready for Business checks to ensure highest data quality for real time trading users.
- Spearheaded development of new Angular frontend UI for Query Building and displaying Bond Reference data via AG Grid.
- Developed real-time and batch Java Spring data loaders from various source types (CPS/REST/Sybase/KDB/File/NoSQL).
- Designed in house Stored Procedure and Data merging functionality for ease of onboarding new users and tailoring to their needs.

Morgan Stanley

New York, NY

Technology Analyst Internship – Institutional Securities Tech – Backend Developer

Jun 2020 – Aug 2020

- Utilized Java and the Spring Framework to monitor application usage statistics
- Leveraged Apache Kafka services to store usage data in Elastic Search indices.

EDUCATION

Morgan Stanley Technology Analyst Program

New York, NY

Graduated from Morgan Stanley's rigorous 10 week Backend Developer Training Bootcamp

Aug 2021 – Nov 2021

Stevens Institute of Technology

Hoboken, NJ

Master of Engineering - Applied Artificial Intelligence

Aug 2020 – May 2021

Stevens Institute of Technology

Hoboken, NJ

Bachelor of Engineering with High Honor in Computer Engineering, Minor in Computer Science

Aug 2016 – May 2020

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, Scala

Frameworks & Systems: Spring, Project Reactor Core (Flux), Elastic Search, Mongo DB, Tornado, Angular, Distributed Systems

Infrastructure & Tools: Kafka, CPS/MQ, Docker, Node.js, React, Git, Google Protobuf, Sybase/Postgres/KDB, OpenTelemetry
